

Dear Hiring Manager,

I am writing to express my interest in the Senior Software Engineer (React.js & Node.js) position. With extensive experience building scalable, high-performance web applications using modern JavaScript frameworks and backend technologies, I am excited about the opportunity to contribute to your team and help drive impactful products forward.

Over the past several years, I have worked extensively with **React.js** to develop clean, responsive, and maintainable user interfaces, focusing on performance optimization, reusable components, and excellent user experience. On the backend, I have strong hands-on experience with **Node.js**, designing and implementing RESTful and event-driven APIs, integrating databases, and ensuring application reliability, security, and scalability.

In my previous roles, I have:

- Led the design and development of complex frontend and backend features end-to-end
- Collaborated closely with product managers, designers, and QA teams to deliver high-quality solutions
- Mentored junior engineers and conducted code reviews to maintain high engineering standards
- Improved application performance, reduced technical debt, and introduced best practices in testing and deployment

I am particularly comfortable working in agile environments and enjoy taking ownership of features from concept through production. I value clean code, thoughtful architecture, and continuous learning, and I am always eager to adopt new tools and approaches that improve team productivity and product quality.

I am enthusiastic about the opportunity to bring my technical expertise, problem-solving skills, and collaborative mindset to your organization. I would welcome the chance to discuss how my background aligns with your needs and how I can contribute to the success of your engineering team.

Thank you for your time and consideration. I look forward to the opportunity to speak with you.

Sincerely,
Mohammad Towfiq Hossen
